BLOCK**

**TEMPERATURE
CONTROL**

**ENERGY
EFFICIENT**

ENHANCE COMFORT. SAVE ENERGY.
CREATE A BETTER INDOOR ENVIRONMENT.

SMART AIR CONTROL FOR
MODERN SPACES

Air Curtain Series

Working quietly, the **AIRX** Air curtain acts as an invisible wall that contains the good and protects from the unwanted. The wide range of application enable it to be installed in the numerous locations from over the doorways, windows and openings between indoor and outdoor or between two interior spaces.

Features

- 1 Full metal housing with unique design and powerful airflow.
- 2 Centrifugal type fan and quiet operation.
- 3 Air speed greater than 18.0 m/s.
- 4 Adjustable deflector to position according to different preferences.
- 5 Slim profile and elegant design blends with an interior.

The Good, Stays in.

By minimizing leakage of cool, clean and desirable air, indoor temperature is kept without big fluctuations. This improves the occupants comfort level.

When cool air is kept in, compressor will be working less, hence lower energy consumption, power bill and longer lifetime, a definite winner against the rising cost.

Places to Install

Between Indoor and Outdoor

- Cafe, Restaurants, Garage, Offices, Factory, Warehouse, Convention Center.

Between Interior Spaces

- Warehouse/Finish Good Area, Refrigeration Room, Kitchen, Air-Conditioned Space.
